Move. Play. Heal

**THERAPY THAT
KIDS LOVE.**

**OUTCOMES
THAT
PROFESSIONALS
TRUST.**

Interactive game-based therapy solutions that turn exercises into engaging experiences for better participation, faster recovery and meaningful progress.

Fun & Engaging
Therapy

Improved
Participation

Real-time
Analytics

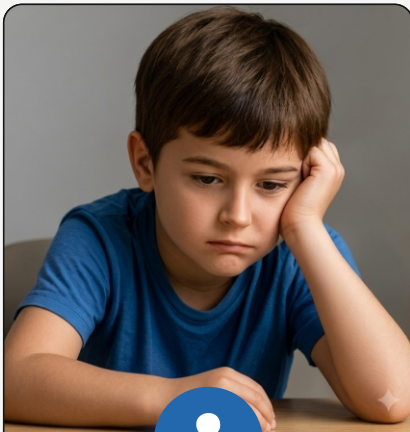

Better
Outcomes

Turning Pain into Play.
Turning Play into Progress.

THE PROBLEM

Traditional therapy can be challenging for both children and professionals.

Low Engagement

Repeating the same exercises leads to boredom and a lack of interest

Pain & Discomfort

Focus remains on pain and difficulty instead of progress and motivation.

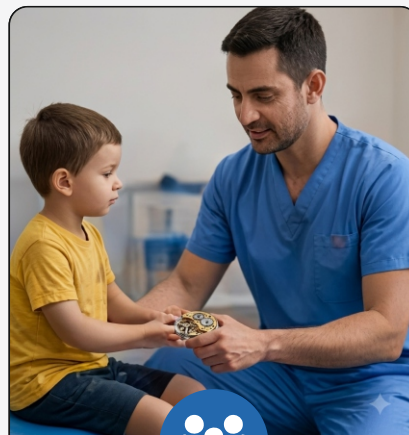

Limited Variety

Traditional tools offer limited ways to make therapy interactive and fun.

Manual Tracking

Tracking progress manually is time-consuming and prone to errors.

Different Needs

Patients need different exercises and difficulty levels to stay challenged.

Therapy should motivate, not intimidate.
It should be a path to **progress**, not a reminder of pain.

THE SOLUTION

NoPain Games brings fun, focus and function together.

An interactive game-based therapy system designed for occupational and physiotherapy professionals.

- ✓ Turns therapy into play with engaging games.
- ✓ Supports a wide range of exercises for all age groups.
- ✓ Real time tracking and AI-powered analytics.
- ✓ Adjustable difficulty levels to match every individual.
- ✓ Multiple games for the same exercises to keep it exciting and effective.
- ✓ Support Multiple Languages

Strengthens different body parts with fun and engaging exercises.

Helps patients enjoy therapy and achieve better outcomes.

Converts pain elements to fun and Focus elements.

AI-based analytics helps professionals make smarter decisions.

KEY BENEFITS

Higher Engagement

Makes therapy enjoyable and improves participation.

Better Outcomes

Regular practice with motivation leads to faster and sustainable progress.

Smart Tracking

Real-time data and AI analytics help therapists make informed decisions.

Customizable Therapy

Adjust difficulty and games as per the patient's ability and goals.

Versatile & Scalable

Suitable for clinics, hospitals, rehab centers and home therapy.

For Occupational & Physiotherapy Professionals

For Pediatric Therapists & Autism Interventions

For Clinic Decision-Makers
